The idea behind this album was to collect all my songs made with 32-bit ATARI computers: Falcon 030 and Atari TT. Finally I decided to add also two songs made with the 16-bit machine - Atari 520ST - but those have been made in MIDI technique, using also the classic module - Roland MT32. All the songs have been recorded from real machines, the sound hasn't been changed.

As the bonus track I added a song created with 8-bit computer - Atari 600XL - with heavy postproduction setup: track-by-track recording / filters / phasers / choruses / flangers / delays / echoes / reverbs / equalizers / compressors / limiters.

Guitars on the 9th track "Brutal attack" by Tfardy.
